### (57) Abstract

**PROBLEM TO BE SOLVED:** To provide a hair dyeing applicator which can uniformly and quickly apply a chemical to hair from the roots to the ends of the hair.

**SOLUTION:** This hair dyeing applicator 11 comprises a bottomed, cylindrical container 12 for containing a chemical, and a comb body 13 connected to the upper end of the container 12. The comb body 13 has a rod-shaped shank 15, and a pair of lines of comb teeth 18 are formed on one side of the shank 15 via a base 17. The pair of lines of comb teeth 18 are oppositely disposed and formed so that the interval between the lines gets wider toward the ends of the comb teeth 18a. Each line of comb teeth 18 comprises numerous comb teeth 18a taking the form of triangular plates, and a discharge opening 20 is formed through each comb tooth 18a. The inside of the container 18 communicates with a distribution chamber provided inside the shank 15 and the base 17, and opens to the discharge opening 20 of each comb tooth 18a via a guide pas-
